

About Us

BaseSMIS is a robust School Management Information System. A 100% platform that can rival some of the best solutions in the world with affordable, scalable pricing. With our platform, you can decide to host any server in your network or in Cloud, which immediately open new door to School Information Management in the 21st century.

SMIS gives you the opportunity to bring your Data in a centralize storage for easy synchronization between your School, Teachers, Parents, Students, Accountants, Librarian, etc.

How It Works

SMIS is designed to seamlessly work with your present mode of operations. It allows access roles for Admin, Teacher, Student, Parent, Accountant and Librarian.

It's a system that is built to fit all in one with modern functionality integration such as multi-language, template, parent monitoring, timetable, fees management, exams automation, students' promotions to new class, daily attendance, transport management, events management, syllabus document management, hostel management, expenses management, and lots more.
